

Education

Las Americas Institute of Technology (ITLA)

Expected Graduation Date: April 2015
Software Development Associate Degree
w/ Excellence Center's Scholarship
3.7 GPA

Experience

Branding Designer & Organizer

UX-ITLA Conference
December 2014

A top tech-conference about making software easier and enjoyable to use through the use of the latest techniques in user research and design. Served as 'Crew Leader' assigning tasks and giving direction to others on the team.

Front-end Developer

Innovapp Hackathon
November 2014

Designed and developed the app and a new marketing website for the bay area startup that helped drive new downloads for the beta of the App before the day that the contest even start.

Staff Leader & Google Representative

Google I/O conference
June 2014

Responsible for leading and coordinating a small group of 76 assistants to one of the biggest technology conferences in the year. Skills used in this position include leadership, time management, and working as a team member. Such a wonderful event, this was one of the best experiences I've got so far in the year.

Spanish & English Interpreter

대한민국 IT 봉사단 (Korea IT Volunteers) || ITLA
Summer 2013

Worked as a volunteer Interpreter (English - Spanish) for a Student exchange program, assisting non-Spanish speaking Korean Volunteers communicating with other students and teachers on campus and the classes that they offered, such as iOS and Android Development.

Graphic Designer Intern

Creativ4 Inc.
Summer 2012

At Creative4, my duties included sitting in on client meetings, helping with production work, coming up with internal project ideas, and a broad range of other creative work. Having agency experience now really helps to see all sides of the industry.

Projects

Busmed

November 2014

Worked as the lead UX designer within a group of young individuals in a 54 hours straight hackathon, building a new and exciting app for the Android platform.

Dunk AMET

July 2014

Dunk AMET is an open-source visualizer for the work done for the dominican pedestrian control department. Has been posted on a popular version control, Github.

Chikunkunya Reporting WebApp

Spring 2014

Worked as the lead back-end and a front-end developer on a side project with a team of ITLA's co-ops creating a new solution for Dominican's Red Cross.

Skills

User Experience Design

From competitive research to deep usability testing... I got it covered.

Mobile Development

Turning mobile apps and websites into full and lovely pocket experiences.

Web Development

Highly passionate about learning new web development tools and frameworks.

Customer Empathy

Loving the customer and always developing with them in mind.

Team Collaboration

Working alongside PMs and engineers to build products fast and efficiently.

Technologies Used:
